SELECTED PROJECTS

Movie Recommendation System | *Python, Machine Learning, Scikit-learn*
Developed a content-based recommendation system that evaluates film similarities and delivers tailored movie suggestions.

Health Score Predictor | *Python, Machine Learning, Data Modeling*
Created a predictive health index model estimating individual wellness metrics based on multi-factor demographic and biometric data.

Quora Question Pair Prediction | *Python, NLP, Machine Learning*
Engineered an NLP model to classify duplicate question pairs, employing feature engineering, cosine similarity, and TF-IDF.

Fitness Tracker Web Application | *Python, Flask, SQLite*
Built a responsive fitness tracking web app allowing users to monitor workouts, calorie intake, and visualize progress.

Weather Forecast Application | *Python, Flask, OpenWeather API*
Implemented a real-time weather portal providing accurate multi-city weather statistics, humidity, and forecasts.

Graphic Design Portfolio | *Adobe Suite, Digital Design, Typography*
Designed a diverse collection of marketing graphics, logos, posters, social media media kits, and brand collateral.
